Ideas flow through him fast but he understands them all in a flash; equal ability to read and to compose in more than one genre. Although he is still a young writer, the many reviews he has written testify to his capacity to provide a wide range of his chosen topics and to give the reader many sources for further reading on each topic. He is fiercely enthusiastic and starts to write only when he has something interesting to say. Although his works are in several genres, his voice is very accessible because it is sharp and witty. He can write from any point of view, can see the situation both from the inside and the outside. His authority is unquestionable. His only weakness is that some of his sayings can seem redundant. I have always read and enjoyed his blog and now you can see what he writes in an archive of his posts to make them easier to find. The first time I read of him was in a catalogue of works about the impact of cold on animals. At first I was sure that he was being sarcastic when he said that, for the animals, winter would be the main reason for their death and seemed to imply that we should see winter as the worst period of the year. The experience was, however, a lesson to me: often to read too much into what a person says can lead to misunderstanding because of the anger or sarcasm that the writer may be trying to achieve. He gave me more of a warning on the subject a little while later: "There are humans who are not always nice to wild animals. But then, there are humans who don't like wild animals because they are wild. I'm not sure if it is one or the other; maybe they are both." Please forgive any mistakes that have crept in on this post, I learned a lot. I haven't read a lot of the writings of Leo Tolstoy, but he has done much to teach and to inspire me. In particular I have been impressed by his determination to do his work by himself even if that meant very low income and lack of social contacts, and his constant efforts to portray in a simple and elegant way the problems of the basic issues of life. His critical work is based on a whole philosophy of life. Of the way we should see the world and treat it. His first series of his major works - the book of a Christian Christian and the book on "How do

For the Love of Words: A Linux Text Editor, even on iPhone - alphadoggs ===== dang Discussed at the time: [----- Anm1 Can we get a landing page with a link to the OS X and Windows version? I don't know much about text editors, but I think many people in that niche would be interested in seeing screenshots and/or a list of text editors they can use on Linux. ~~~ nthcolumn Unrelated to the discussion, but just a plug for the GEdit editor. Even on Windows, at the time of writing, GEdit is the only editor to have the same stable API and can be made into something like a 'complete' workstation (ubuntu-ish) on Windows. If you cannot find what you want, as in an intuitive keyboard interface (so much wasted keyboard skill at startup if this is not there), then you can literally drag and drop a file or directory into Gedit and it will finish what needs doing. I had to put up with Textadept for a long time, the latest version was too buggy for my needs. ~~~ dontstartup Github page: [~~~ nthcolumn True, now that I have GEdit available on Windows I use it. But I can't remember the last time that I could not do a file edit on a wubi install. The home page is also less than informative. ----- jimmywanger The impetus to this article is that Light Table/Eclipse get a new release every few months. Unfortunately, it's hard to push editors back since the people who use them are a tiny niche, and not a growing one. ~~~ ianbicking I use Atom for almost all of my editing needs on Linux and Windows. There are plenty of pretty good text editors that run natively on Linux.
