MediaRescue Pro Crack [Win/Mac]

If you've lost a photo or audio file or your PC has crashes and doesn't start anymore, you will need an expert that can help you find the files or machines you have lost, fast and efficiently. MediaRescue Pro is the professional software to find the files that your computer has lost or damaged. The powerful scanning features and comprehensive recovery assistance allows the program to find any data stored on all kinds of removable devices. Customize your configuration easily and set your own names and dates for your recovery items. Drag&Drop recovery is supported for instant recovery. Our opinion This free and efficient tool lets you search your hard drive for data that was accidentally deleted or overwritten. Also, if the files you are searching for are stored on a memory card, USB stick or external drive, the application can search it. It uses a multi-threading scanning technology to speed up the data search, so you get a quick answer and not an endless wait. One of the most common problems that many PC users deal with on a daily basis, it's the loss of files. Be it that you've accidentally deleted some files or that you've overwritten other ones, you've tried to recover them through third party software without success. A good tool to recover your lost or damaged files is Data Recovery Pro, as it lets you recover the files from a variety of sources such as hard drives, USB sticks, memory cards and CDs. In addition to its multi-platform functionality, the application is also packed with a lot of advanced features for the novice users. To help you recover those files, Data Recovery Pro has a useful interface that lets you access them in a fairly convenient way. The wizard-driven technique keeps the instructions easy to follow, and the user is left with a file explorer to find and select the files he's looking for. The search method for local and remote files on the system allows you to get the data you're looking for, even if you haven't installed Data Recovery Pro yet. In addition to that, the image scanning technique allows you to get the files you need by scanning for images on the hard drive, the ones stored on memory

cards or on files on USB drives. Besides that, the virtual drive scanning function allows you to recover files from your computer by scanning for drives other than the one that you are booting. What's more, the software is able to perform two-way synchronization

You can get back your lost data in no time with just a few steps. All kinds of lost data can be recovered by it. Data loss on Mac has become common. It can result from virus infection, OS upgrade, disk error, unexpected shutdown, user mistakes, and so on. Most data loss on Mac can be recovered by using internal recovery features of mac. But sometimes it is not enough. For such a situation, you need a Mac file recovery software. Data loss on Windows is also very common. It can be caused by system crash, hardware failure, accidental deleting, virus infection and so on. It is very annoying when you can't find your lost files. Fortunately, a professional file recovery software has solved this problem. From recent hard drive crash to data failure on mobile phone, it can provide the most reliable data recovery results. The major problem that stop people from using the file recovery software is the file size limit. Most of the file recovery softwares cannot handle files above 250MB, which is very small if you have big or many files. With the program, you can recover almost every file, even the ones that exceed the size limit. Moreover, you are allowed to recover many files. If it is not enough, you can split them into a few file chunks, and then you will not have any limitation. You can also recover data from Windows mobile phone. Mobile phone data loss is often caused by unexpected shutdown, physical problem or virus infection. If you lost your important and confidential data, you need to recover it as soon as possible. Fortunately, a professional file recovery software can help you out. It is so efficient that you can easily recover all

kinds of lost data. It also comes with convenient features, so you can be in control of your data and files. No matter what kind of data loss you have experienced, you can recover files with it.
