--- 3D CityCAD, the next generation of CITYCAD, brings together essential CAD tools such as the global routing engine, multi-purpose design windows, basic project management tools and complete CAD integration into a single powerhouse. 3D CityCAD comes with a comprehensive set of comprehensive prebuilt reusable objects, which covers more than 90% of the actual design tasks, and additional custom reusable objects in a variety of categories like Transport, Utilities, Land and Townscapes etc., which allow you to customize and generate additional objects for your specific needs. With the enhanced 3D CityCAD, you'll be able to take your masterplan to the next level. The easy to use interface comes complete with a comprehensive help system, online tutorial videos, and step-by-step User Guides, allowing you to get the most out of the software. 3D CityCAD supports multiple layouts including radial layout, linklines layout, plat, panorama layout and multi-layer layout. You can even connect to live

data such as water, sewage or energy infrastructures and expand the design, applying project-specific constraints. 3D CityCAD Features: ------------------- • Create, modify and reuse your own city models • Import and export 3D models in a number of formats, including DXF, DWG, FBX and MDD • Upload your projects to our open database or share with others • Generate panoramas, flythroughs, renderings and interactive 3D walkthroughs • Customize and personalize all rendering and layout settings • Add and connect to live data • Design city models quickly and intuitively using dynamic tools and Windows • Preview projects in the 3D CityCAD workspace or watch as the model is updated live • Navigate around the model using a global 3D mouse • Add, delete and arrange buildings, roads, poles, railways and lighting • Control building heights and the overall look and feel of the final design with rules • Set building types, zoning and address labeling • Customize layouts, sublayouts and views • Choose between 3D and 2D cityscapes and even rotate the entire model • See CityCAD in action – watch as CityCAD updates your design in real-time • Powerful raster

and vector editing • Quickly create and modify labels, annotations, lights and views • Support for colored and labeled rulers • All the tools you

CityCAD Serial Key is an easy-to-use application that allows you to analyze CAD schematics in order to improve the design quality. You can sketch a network of streets, set building heights and land uses, and watch as floor areas, densities and other values are calculated automatically. Unlike other CAD tools, CityCAD has been created specifically for the needs of the city design and planning community and enables integrated, holistic analysis of your urban masterplans in the early design stages. Adobe Edge Inspect is a web application for the design review of the geometric properties of the most common vector-graphics formats: PDF, EPS, and SVG. The Web-application enables immediate color selection (RGB, CMYK, Hex), which can then be saved directly in the application itself or exported for further editing in Adobe InDesign or Illustrator. CityCAD is a new CAD tool that makes it easy to analyze CAD schematics in order to improve the design quality. Unlike other CAD tools, CityCAD has been created specifically for the needs of the city design and planning community and enables integrated, holistic analysis of your urban masterplans in the early design stages. - Designed specifically for the City Planner - Fully compatible with AutoCAD, AutoCAD LT, AutoCAD 360 and AutoCAD 360 Architect - Not just a simple CAD tool, but also an integrated planning tool for analyzing CAD models, including Floor Plans, Drawings, Sections and Layouts - Displays calculation results in real time, showing values as they are computed - Provides analysis results graphically in the form of a compact table and map, and can be displayed as a single- or multi-page plan - Supports the standard page layouts and page numbering conventions of the American Institute of Architects (AIA) and the Federal Emergency Management Agency (FEMA) Standard Plans - User-friendly: flexible ways to enter data and to

customize the interface - Supports building symbols from other CAD packages - Versatile: adds a new layer to your CAD drawing or to a drawing from another package - And even more! Read the full description of this application on the Schematic Network. Key Features A new comprehensive CAD tool for creating floor plans, building diagrams and master planning documents. Covers a wide range of CAD packages with support for AutoCAD, AutoCAD LT, AutoCAD 360 and AutoCAD 360 Architect CityCAD integrates CAD with many planning and design disciplines, providing a powerful and easy-to-use solution to meet the needs of a wide range of urban planners and engineers. Built-in with powerful plotting tools, it makes it easy to analyze CAD schematics in order to improve the design quality. CityCAD Features include: * CAD for AutoCAD, AutoCAD LT, AutoCAD 360 and AutoCAD 360 Architect * CAD Schematics, including Floor Plans, Building Diagrams, Master Plans, Project Reports, Construction Drawings and Data Rooms * Connects to the IDC and UCC Design Centers, and automatically updates when new data is received * Designed specifically for the City Planner * Fully compatible with

AutoCAD, AutoCAD LT, AutoCAD 360 and AutoCAD 360 Architect * Not just a simple CAD tool, but

What's New In CityCAD?

- An easy-to-use CAD application that has been specifically developed for the City planning & design community. - Efficient interactive urban planning & design tool to plan, design & optimize masterplans. - A highly optimized editor that provides more features than alternatives such as Cadsoft Eagle and Cadsoft Sketchup for easy handling of CAD Geometry. - Works with all major CAD programs such as AutoCAD, MicroStation, Revit, etc. - Provides additional support for Structural Analysis - 'CityCAD' is a Registered Trademark of CiCAD, Inc. - Includes 2M+ Geometry, Automatic Geometric Analysis, Floor Area, Perimeter Measurement, and many, many more features - Brought to you by the experts at CiCAD, Inc, makers of the award-winning CityCAD (City Cadastre) software for the Architectural and Building Contractor Industry CityCAD 3D Architect is a CAD and GIS program which includes a complete implementation of the functionality

from CityCAD 2D Architect as well as a
virtualized 3D environment. The most
important feature of CityCAD 3D Architect is
the integration of the 3D environment into
any architectural design process or building
information model. When you start the
modeling process, CityCAD automatically
creates a set of complex 3D views such as
floor plans and top views as well as ortho
images. (pro) CityFoto CAD (version 4.3.1)
is for CAD users to quickly create all kind
of graphics without much effort. With this
program you can create 3D drawings, print
drawings, convert drawings and perform quick
measurement & annotation to drawings.
CityFoto CAD (version 4.3.1) is a reliable &
free tool for CAD users. CitySeed
Interactive CAD is a powerful & easy to use
application that combines both 2D and 3D CAD
applications. CitySeed Interactive CAD is
not just a CAD application, but a fully
integrated CAD tool. Using CitySeed
Interactive CAD, you can model roads,
buildings, pathways, parks, and plan
community designs. You can also convert the
CAD geometry into a variety of vector-based
formats such as EPS, DXF and DWG. And,
CitySeed Interactive CAD is compatible with
