Fifa 22 Features Key:

- **Transfer Market** – for the first time in a FIFA release, it’s easy and convenient to construct the game’s roster. Tap the new “Build Squad” button to adjust the starting position of players in your team. From there, you can immediately drag player images up and down the team, getting the exact squad that fits your unique, all-important team style – from veteran to young, flashy up top, or right to the back. You can also select custom formations from the new pre-defined “Team Styles” and you can add players by tapping the new “Player Crafting” feature.
- **Modes** – FIFA’s new “Ultimate Edition” take on the franchise will include robust Goal of the Year and Accuracy Moments modes that allow you to benchmark your performance and compare your mastery of your favorite goals and saves. Add to the celebration, and see when the player or team has earned the bonus for a shot that you scored or a save that you made. You can also check the players who have created these moments.
- **New Balls** – FIFA 22 will feature three distinct balls: the new Adidas RB19 Pro, the new PUMA x adidas X 17 FG Pack, and the new Nike AeroPro. These balls are specially-designed for the new motion-controlled gameplay and dynamic player behaviours. Both Adidas and Nike have “dynamised” the shape of their balls to offer more precision and comfort for the all-new player movements, allowing players to bend and swing the ball with greater ease.
- **Global Teams** – a new selection of teams and alternate kits throughout the world will be available to play, provide additional depth and variety in the downloadable content update.
- **Friendly Matches** – also included in the gameplay update is a couple of brand new “Friends Matches”, where you can play online against a friend by picking the opponent’s team. Or play some pre-made games for competitive modes and so forth.
- **Player Brain** – the “Player Brain” feature is a new way to unlock bonus content in FIFA like the ability to use your in-game skills to unlock items, big team photo cards, pack designs, superstars, etc
